NOVA HACKS

SPONSORSHIP PACKAGE
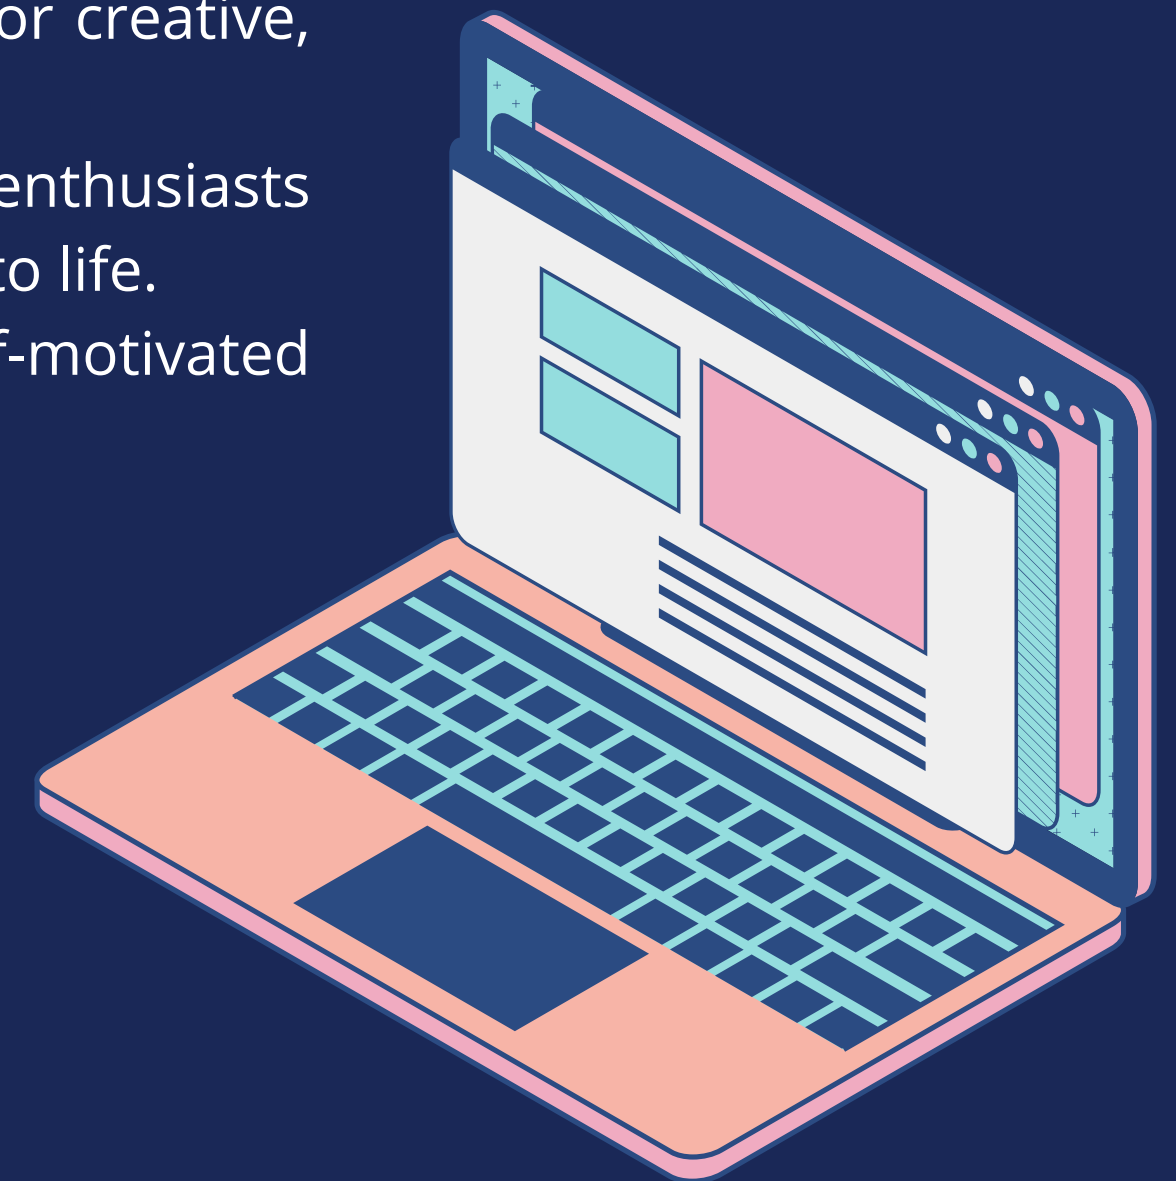

What is NOVA Hacks?

NOVA Hacks is a student-led initiative by coding enthusiasts at Villanova University. Collegiate hackathons have been a fast growing movement across the country- these events bring together students from different backgrounds into a common space where they can collaborate and explore their creativity. And we would like put Villanova on the map as a hub for creative, collaborative, novel and innovative programming.

Our vision in organizing the first NOVA Hacks is to bring in a hundred plus hacking enthusiasts with varied experiences for a two-day event where they will work to bring their ideas to life.

NOVA Hacks is an excellent opportunity for your company to tap into the pool of self-motivated students and talents in the Greater Philadelphia and the surrounding area.
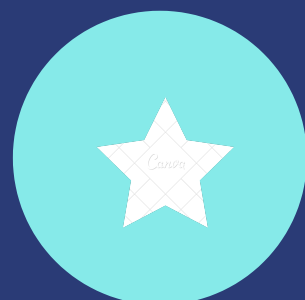

Why sponsor NOVA Hacks?

- Mentor participants and establish a relationship with top hackers
- Gain early access to resumes, GitHub profiles, and email addresses
- Fund a branded prize to get students to develop projects on your API
- Demo your APIs and products to hundreds of students
- Demonstrate your support of the region's rapidly growing hacking community

We have included details about how you can support NOVA Hacks below. If you have any questions, please don't hesitate to contact us at **novahacks2022@gmail.com**. NOVA Hack team is happy to assist you if one of the packages does not fit your needs.
